Residents of Rouleau:

This notice is being sent to all residents of Rouleau of the upcoming actions that will be performed by PCL Construction.

PCL is planning to tie-in the two waterlines on October 14 & 15, 2021. Water will shut-off to all residents for the above mentioned two days from 7:am to approximately 7:pm. The sequence of events is to install, flush and disinfect the new water tower bypass and the Water Treatment Plant high flow bypass lines into the existing water system.

Prerequisites for Water Shut Down;

- * **The Town will provide proper notice to the residences of Rouleau of a 2 (two) day, 12 (twelve) hour domestic water shut down.**
- * The Town is to advise Water Security Authority of a boil water advisory to the town of Rouleau starting day 1 (one) of water shut down.
- * **Boiled water advisory issued to residences of Rouleau starting day 1 (one) of water shut down.**

Day #1 of Water Shut Down;

- * Isolate water tie-in points from system with town personal at **7:00am**
- * Perform installation of bypass line into existing water system line.
- * Flush system for about 2 hours through fire hydrants in the area.
- * Reinstate water flow to the residences of Rouleau by **7:00pm**

Day #2 of Water Shut Down;

- * Isolate water tie-in points from system with town personal at **7:00am**
- * Perform installation of bypass line into existing water system line.
- * Flush system for about 2 hours through fire hydrants in the area.
- * Reinstate water flow to the residences of Rouleau by **7:00pm**

Follow up Prerequisites;

- * **Boiled water advisory to remain in effect until positive water samples return.**
- * Contractor/town personal to draw water samples from longest point and get analyzed by testing laboratory
- * Sampling to continue until samples meet potable water guidelines and consultant/owner approval.
- * Boiled water advisory lifted.

Precautionary Drinking Water Advisory

This Advisory applies to residents and users of the Town of Rouleau's distribution system and is effective Thursday, October 14, 2021 at 8:00 am.

Pursuant to clause 36(1)(a) of *The Environmental Management and Protection Act, 2010* this Precautionary Drinking Water Advisory is issued due to a water distribution system depressurization due to a valve installation and therefore the safety of the drinking water supply cannot be ensured at all times. Therefore, pursuant to clause 36(1)(b) of *The Environmental Management and Protection Act, 2010*, consumers must be notified to:

- (a) boil all water, used for drinking purposes, for at least one (1) minute, at a rolling boil, prior to use;
- (b) boil water to be used for other activities where it may be ingested, including:
 - (i) brushing teeth or soaking false teeth;
 - (ii) washing fruits and vegetables;
 - (iii) food or drink which will not be subsequently heated; and
 - (iv) ice cubes;
- (c) not use the water for washing dishes, unless the water has been boiled or the dishes are sanitized in another fashion. Washed dishes and utensils can be soaked in a bleach water solution (approximately 2 tablespoons of bleach per gallon or 10 ml of bleach per liter of water) for at least two minutes after being washed to kill any bacteria which may be present.
Note: **Do not mix bleach with soaps or detergents.**
- (d) not drink from any public drinking fountains supplied with water from the public water supply;
- (e) ensure that younger children and infants are sponge bathed;
- (f) use an alternative water source known to be safe, if they do not wish to boil the water; and
- (g) consult with your physician if you have cuts or rashes that are severe before using the water.

Under most circumstances, there is no need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine.

This Advisory is effective on the date and time listed above and will not be lifted until the water supply is determined to be completely safe.

Residents and operators of public facilities may access detailed precautions for PDWAs/EBWOs online at www.saskhealthauthority.ca/facilities-locations/roy-romanov-provincial-laboratory/water-testing-public
